

CarbCounter+

Count carbohydrates or on a strict diet?

The Carb Counter Plus is being developed to help you!

Designed to help those with Diabetes manage their carbohydrate intake, and log BG readings
And capable of so much more!

Combining a food scale and a PDA that fits in your pocket, it lets you weigh and calculate the carbohydrate or nutritional content of the food you eat. It logs the result and then for diabetics helps calculate the requires insulin dosage. It will be do this and much more.

This is part of a competition and needs you, your family and friends to vote for it so that it can become reality.
